

Asignatura:

Programación de sistemas

Sustentado por:

Chelsea Massiell Suazo García – 61911443

Dirigido:

Ing. Kevin Cruz

Asignación:

Examen I

Campus:

Ceutec Sede Norte

Fecha:

20/06/2021

MÉTODO DE LA BURBUJA

```
#include <stdlib.h>
#include <stdio.h>
#include <time.h>
#define TAM 100
void imprimeCB(int *CB) {
int i;
for(i = 0; i < TAM-1; i++) {
printf( "%d, ", CB[i]);
printf( "%d\n", CB[i]);
int main() {
int CB[TAM];
int e, i, auxiliar;
srand((unsigned int)time(NULL));
for(e = 0; e < TAM; e++)
CB[e] = (int)(rand() \% 100);
printf( "Antes de ordenar\----\n");
imprimeCB(CB);
for(e = 0; e < TAM; e++)
for(i = 0; i < TAM-1-e; i++)
if(CB[i] > CB[i+1]) {
auxiliar = CB[i+1];
CB[i+1] = CB[i];
CB[i] = auxiliar;
}
printf( "\nDespués de ordenar\n----\n");
imprimeCB(CB);
```

BURBUJA MEJORADA

```
#include <stdlib.h>
#include <stdio.h>
#include <time.h>
#define TAM 100
void imprimeCB(int *CB) {
int i;
for(i = 0; i < TAM-1; i++) {
printf( "%d, ", CB[i]);
printf( "%d\n", CB[i]);
int main() {
int CB[TAM];
int e, i, auxiliar, intercambio;
srand((unsigned int)time(NULL));
for(e = 0; e < TAM; e++)
CB[e] = (int)(rand() \% 100);
printf( "Antes de ordenar\n----\n");
imprimeCB(CB);
 for(e = 0; e < TAM; e++){
intercambio = 0;
for(i = 0; i < TAM-1-e; i++){
if(CB[i] > CB[i+1]) {
auxiliar = CB[i+1];
CB[i+1] = CB[i];
CB[i] = auxiliar;
intercambio =1;
}
if (intercambio==0){
printf( "\nPara en la iteración %d\n",e);
break;
}
printf( "\nDespués de ordenar\n----\n");
imprimeCB(CB);
```

MÉTODO DE SELECCIÓN

```
#include <stdlib.h>
#include <stdio.h>
#include <time.h>
#define TAM 100
void imprimeCB(int *CB) {
int i;
for(i = 0; i < TAM-1; i++) {
printf( "%d, ", CB[i]);
printf( "%d\n", CB[i]);
int main() {
int CB[TAM];
int e,i,PosMenor,aux;
srand((unsigned int)time(NULL));
for(e = 0; e < TAM; e++)
CB[e] = (int)(rand() \% 100);
printf( "Antes de ordenar\n----\n");
imprimeCB(CB);
for (e=0; e<(TAM-1); e++) {
PosMenor=e;
for (i=e+1;i<TAM;i++)
if (CB[i]<CB[PosMenor])</pre>
PosMenor=i;
aux=CB[e];
CB[e]=CB[PosMenor];
CB[PosMenor]=aux;
}
printf( "\nDespués de ordenar\n----\n");
imprimeCB(CB);
```

MÉTODO DE INSERCIÓN

```
#include <stdlib.h>
#include <stdio.h>
#include <time.h>
#define TAM 100
void imprimeCB(int *CB) {
int i;
for(i = 0; i < TAM-1; i++) {
printf( "%d, ", CB[i]);
printf( "%d\n", CB[i]);
int main() {
int CB[TAM];
int e,i,k,temp;
srand((unsigned int)time(NULL));
for(e = 0; e < TAM; e++)
CB[e] = (int)(rand() \% 100);
printf( "Antes de ordenar\n----\n");
imprimeCB(CB);
for (e=1;e<TAM;e++){
temp=CB[e];
i=0;
while (CB[i]<=temp)
i++;
if (i<e)
for (k=e;k>i;k--)
CB[k]=CB[k-1];
CB[i]=temp;
}
printf( "\nDespués de ordenar\n----\n");
imprimeCB(CB);
```

QUICKSORT

```
#include <stdlib.h>
#include <stdio.h>
#include <time.h>
#define TAM 100
void quickSort( int[], int, int);
int partition( int[], int, int);
void imprimeCB(int *CB) {
int i;
for(i = 0; i < TAM-1; i++) {
printf( "%d, ", CB[i]);
printf( "%d\n", CB[i]);
int main() {
int CB[TAM];
int e;
srand((unsigned int)time(NULL));
for(e = 0; e < TAM; e++)
CB[e] = (int)(rand() \% 100);
printf( "Antes de ordenar\n----\n");
imprimeCB(CB);
quickSort(CB, 0, TAM-1);
printf( "\nDespués de ordenar\n----\n");
imprimeCB(CB);
